Knowing that $V_0 = 2 = 1.02V_1$
 $S_0 = 1 = 0.1LE$
 $V_1 = 1.1LE$

$$0.1 - 1.3 = S_1 - (1.02 * 1.3)$$

Solving the equation to determine the new tariff or the new local minute price we find that:

$$S_1 = 0.12LE$$

2.5.2. MENATEL NEW ISLE CARD

In this approach and as a result of the market studies and researches, we found that MenateL ISLE Card is our black horse in the market (89 % of MenateL sales). As a simple calculation of its cost against its profitability to MenateL, assuming that this card consists of 10 LE total revenue and 2.5 LE total variable cost per unit and MenateL sales are 1000 units. This is before the devaluation of the exchange rate, but after the devaluation the cost per unit raised to 4.5 LE (causing a decrease in net income, contribution margin) and the profit as the table shows:

	Total	Per Unit	Total	Per Unit
Sales (1000 units)	10,000	10	10,000	10
Less: Variable cost	2,500	2.5	4,500	4.5
Contribution margin	7,500	7.5	5,500	5.5
Less: Fixed cost	2,000	2	2,000	2
Net Income	5,500	5.5	3,500	3.5

This is mainly why we thought of producing a new face value to the market to increase the profitability margin, and to fill the gap of the increase of the expenses due to the devaluation of the exchange rate, the table shows the results:

	Total	Per Unit
Sales (1000 units)	15,000	15
Less: Variable cost	4,500	4.5
Contribution margin	10,500	10.5
Less: Fixed cost	2,500	2.5
Net Income	8,000	8
